Estimate for replacing a fallen slab in the roof of Sree Gunja Narasimha swamy's Temple and also repairing the mantapam in front of the temple at T. Narasipur.

- Reference -

Executive Engineer's No. 136 of 15.2.07.

— Report —

One of the slabs in the roof of the Verandah round the temple has fallen down and the present estimate provides to replace it with necessary repairs. It is not necessary to have a raised sky lights all round the fallen slab. Since it is an open verandah which gets plenty of light and air and the Construction of the sky light will be costly.

The top of pillars supporting the mantapam in front of the temple are all cracked and the mantapam is on account of this

very unstable and dangerous. It is proposed to cast stone pillars of the required height and dimensions which are available from a fallen mantapam at Jiramakuddu - dress them and then give them as additional support to the top by the side of the existing pillars. These stone pillars will have to be brought nearly 3/4 mile across a very sandy river.

Necessary provision has been made in the estimate
